

Storage & Handling Collapsible Bunds Global 'SC' Range

In today's environmentally aware world, the **Control, Containment & Clean Up** of Chemical, Oil and Fuel Spills is an essential part of a company's compliance with AS1940:2004, ISO14001, Unauthorised Discharge Regulations 2004 or other requirements. Global Collapsible Bunds provide secondary or portable containment for drums, tanks, equipment, vehicles and machinery to help meet these obligations by containing and preventing spills, leaks and drips escaping to the environment.

SCS1100

SCB450

Type	⇒	Secondary or portable bunded storage
Application	⇒	Wherever drums, tanks, machinery & vehicles are stored or parked
Reason	⇒	Capture spills, leaks & drips before they become a problem

- ▶ Collapsible Bunds provide a lightweight and portable solution for safe & convenient storage when handling and dispensing liquids from drums, tanks, machinery or vehicles.
- ▶ Improve site housekeeping by capturing leaks, drips and spills.
- ▶ Easily erected (or collapsed) in seconds using removable epoxy coated fibreglass wall braces that create self supporting walls.
- ▶ Manufactured in chemically resistant heavy duty PVC (900g/m², orange) or extra heavy duty XR-5 polyester (1017g/m², black).
- ▶ Manufactured to any size to suit specific requirements/dimensions.
- ▶ High frequency welded seams provide strength and leak tight spill capture. Drain valves can be fitted if required.
- ▶ Design allows one wall to be collapsed for forklift or vehicle entry.
- ▶ Can be supplied with a protective ground sheet or floor protector to minimise damage in rough terrain or with heavy or point loads.
- ▶ SCB450 and SCS1100 are supplied with a PVC carry bag.
- ▶ Collapsible bunds fold to a convenient size for transport & storage.

Manufactured in Australia

Notes:
 *Stock sizes—larger or in between sizes are made to customers required dimensions.
 Collapsible Bunds are portable bunding units suitable for secondary or temporary storage.
 The use of collapsible bunds should be in accordance with relevant standards and local regulations.
 Collapsible bunds should not be used as primary storage of Class 3 flammable liquids.
 Storage volume is the total non-displaced volume.
