Notes:  
 Maintenance polypropylene is compatible with, and absorbs most acids and bases. The suitability with a specific chemical should be confirmed by referencing the MSDS, a compatibility chart or sample testing. We can provide samples as required.  
 Absorbent capacity will vary depending on liquid viscosity, specific gravity & temperature. Absorbents retain the characteristics of the absorbed liquid. Appropriate PPE should be worn and disposal of used absorbents should be in accordance with local regulations.

Spill Kit can be converted to a "Pollution Control Station" with accessories such as a bin cover, lock, shovel (long handled or non sparking), wall mount sign, bassine broom, squeegee or rake.
