

# Storage & Handling Hazmat Management Transportable Battery Cage # TBCDB4

In today's environmentally aware world, the **Control, Containment & Clean Up** of Chemical, Oil and Fuel Spills is an essential part of a company's compliance with AS1940:2004, ISO14001, Unauthorised Discharge Regulations 2004 or other requirements. Transportable Battery Cages provide save and convenient storage, handling and transportation of used truck and vehicle batteries and help meet these obligations by protecting against spills and leaks of battery acid in the workplace.

TBCDB4

Type	⇒	Transportable cage for truck & vehicle batteries c/w spill collection sump
Application	⇒	For transporting used batteries from remote sites to recycling facilities
Reason	⇒	Safe handling, storage & transport of used batteries

- ▶ Transportable Battery Cages allow a full pallet of used batteries, 400mm high to be stored and transported safely.
- ▶ Extra heavy duty galvanised steel mesh cage with removable roof, 270 degree swing out gate with spring loaded latch and enclosed forklift channels for easy forklift access.
- ▶ HDPE internal lining to protect against acid splashing.
- ▶ Integral spill collection sump manufactured in acid resistant polyethylene. Sump has removable grated floor to allow draining and collection of spilt acid. Removal of spilt liquid is via a drain plug or pump out through the floor gratings.
- ▶ All stainless steel fasteners and appropriate Hazchem Class 8 Corrosive signage.
- ▶ A standard pallet (1170mm x 1170mm) of batteries can be loaded directly into the cage from the front. Alternatively, individual batteries may also be placed directly onto the spill sump grate from the front or top.
- ▶ Forklift access is from two sides to allow easy loading and unloading of full cages onto trucks for transporting.

Manufactured  
in  
Western Australia

**Improves site housekeeping when storing, handling and transporting used batteries.**

**Provides an environmental solution and improved workplace safety by capturing spillage.**
